PROFESSIONAL SUMMARY

MCA (AI & ML) student at Chandigarh University with proven experience engineering AI-powered applications — including a Fake News Detector (94%+ accuracy), an AI Resume Analyzer, and a Sales Forecasting system. Skilled in Python, Machine Learning, NLP, Flask, Scikit-learn, and MySQL, with a solid foundation in Java and C++. Passionate about building scalable AI solutions and collaborating on high-impact software projects. Seeking an AI/ML, Software Engineering, or Data Science internship where I can contribute to impactful products while continuously learning and solving real-world business problems.

EDUCATION

Chandigarh University — Mohali, Punjab

2025 – 2027 (Pursuing)

Master of Computer Applications (MCA) | Specialization: Artificial Intelligence & Machine Learning

Shanti Prasad Jain College — Sasaram, Rohtas

2022 – 2025

Bachelor of Computer Applications (BCA) | Aggregate: 71.4%

TECHNICAL SKILLS

Programming: Python • Java • C++ • SQL • HTML5 • CSS3

AI / ML: Machine Learning • NLP • Scikit-learn • Regression • K-Means • Generative AI • LLMs & Prompt Engineering

Data: Pandas • NumPy • Matplotlib • EDA • Feature Engineering • Predictive Modeling

Tools: Git • GitHub • Flask • VS Code • Jupyter Notebook • Eclipse • Apache Tomcat

Database: MySQL

PROJECTS

Fake News Detection System

Python • Scikit-learn • NLP • Pandas | 2025

- Engineered a TF-IDF + Passive Aggressive Classifier trained on 40,000+ articles, achieving 94%+ accuracy through an end-to-end NLP pipeline covering tokenization, stopword removal, and feature extraction.
- Designed a scalable, production-ready NLP architecture suitable for content verification, misinformation detection, and enterprise media moderation platforms.

AI Resume Analyzer

Python • Flask • NLP • REST API | 2025

- Built an AI-powered web application that parses resumes using NLP, extracts key skills and experience, and generates a quantified job-match score with prioritized improvement suggestions.
- Deployed as a Flask REST API, delivering a full-stack AI product from model development to backend integration — directly applicable to HR technology and intelligent recruitment automation.

Sales Data Analysis & Forecasting

Python • Pandas • Matplotlib • Scikit-learn | 2024

- Conducted EDA on 12 months of retail transaction data, identifying seasonal demand patterns and top-performing SKUs; applied Linear & Polynomial regression models to achieve ~18% MAE reduction over baseline.
- Produced an interactive Jupyter-based analytical report enabling data-driven sales forecasting, trend analysis, and strategic business decision-making.

CERTIFICATIONS

- Introduction to Generative AI** — Certificate Code: 8929155 | 2025
- Introduction to Artificial Intelligence** — Infosys Springboard | 2025
- Introduction to Data Science** — Infosys Springboard | 2025
- Data Structures & Algorithms 3.0 (C++ & Java)** — | 2025
- Interviewing Skills** — Saylor Academy | 2025

ACHIEVEMENTS & ACTIVITIES

- AI Fest 2026** — Presented an AI/ML project among 200+ participants at Chandigarh University's flagship AI competition.
- MindForge Hackathon** — Developed a functional AI solution within a 24-hour team challenge focused on real-world problem statements.
- RealityX Bootcamp, CyberPeace Foundation & DSA Workshop** — Completed AI, cybersecurity, and problem-solving training programs.
